

Georgia Gastroenterology Center

Reduced Repairs by **55%**
and Saves **\$61,000** Annually

The Situation

A gastroenterology center in Georgia experienced frequent flexible endoscope repairs under a prior equipment repair partner. Scopes were regularly sent out for repair, creating costs, technician downtime, and workflow disruption.

The Outcome

- Higher quality repairs that extend scope durability
- Fewer repeat failures and more reliable performance
- Greater scope availability for physicians and patients
- Reduced technician downtime managing repairs
- Improved efficiency across the endoscopy unit

The EndoscopyMD Solution

The center partnered with EndoscopyMD to improve the durability and reliability of their fleet of flexible endoscopes. EndoscopyMD reduced repeat failures and improved scope longevity.
